24 hours watching over the streets of Madrid

During the summer 2005, the mobility management in the city of Madrid made an important step forward. The Control Room situated in *Villa Square* was transformed in a new Urban Mobility Management Center.

The new seat, located in *Albarracín Street*, tripled its space - from 100 m² to 344 m²-and increased the human resources from 7 to 35 staff in 2005.

Since then, all the control works regarding the mobility in Madrid are coordinated in this Center, as well as the decisions in case of mobility troubles, action programs and all the information addressed to the users.

The organization of the Congress has included in the technical program this important visit because it is one of the most interesting centers in analyzing day by day the mobility management in a big city.

Date of the technical visit: 12 December – 4,30 P.M.

Enrique Belda, coordinator of the congress, prizewinner of an International Award on Innovation

Enrique Belda, coordinator of the International Congress on Mobility Management in collaboration with Carlos Rubio, has recently been granted with the “4th International Awards on Road Innovation *Juan Antonio Fernández del Campo*”.

The technical report awarded is titled “Modeling service levels in highways at present time for the mobility dynamic management” and explains a new methodology to calculate at present time the service levels in toll highways improving the current static systems of measurement.

The Foundation of the Spanish Road Association organizes these awards, which ceremony will be held in Madrid next 28 November.
